About the project

As the embodiment of new economic and technological opportunities, cryptocurrency is often presented as a symbol of freedom and decentralization. However, under the cover of innovation are issues that require deep reflection and discussion.

It is becoming increasingly clear that in the world of cryptocurrencies, success in the world of cryptocurrencies is not so much determined by intelligence and analytical skills, but rather by financial resources and the ability to continuously invest. Those with significant capital have a tangible advantage over average investors and are much more likely to succeed. While the less well-off participants are left behind, despite their intelligence and hard work.

This approach not only excludes many talented and promising users, but also creates barriers that hinder the development of true innovation. Intelligence and education take a back seat when financial resources and technical capabilities determine success and dominance.

This is unfair, so we believe it's time to change the game.

We have developed a solution that removes these barriers and ensures a level playing field for all users of the digital economy. Our product aims to create a fairer ecosystem where everyone can fulfill their potential, regardless of their starting point.

Get ready for a revolution that will change the rules and restore fairness in the world of digital finance.

BrainsCoin Concept

BrainsCoin combines the world of cryptocurrency and mind games to create a unique ecosystem that combines a fair approach to reward distribution with the opportunity to improve your own mental abilities.

All games on our platform are divided into four key categories: logic, memory, reaction and attention. Each category focuses on specific cognitive skills, allowing users to develop their mental abilities in a comprehensive way.

Logic

The Logic category is aimed at developing analytical and critical thinking. Games in this category require users to use logical inference and deduction to solve problems and puzzles. These games improve planning and strategic thinking skills, which helps in a more effective approach to solving various problems in everyday life.

Memory

Memory category games help users improve their ability to memorize and reproduce information. These games train both short-term and long-term memory, promoting better learning and retention of information. Users will notice improvements in their ability to memorize important details and information, which is useful in both their personal and professional lives.

Reaction

The Reaction category aims to improve reaction speed and movement coordination. Games in this category require quick and accurate reactions to certain stimuli, which helps develop reflexes and motor skills. Such skills are useful not only in games, but also in a variety of situations that require quick reactions and precise actions.

Attention

Attention category games help to develop the ability to concentrate and notice details. These games train the ability to focus on the task at hand and to ignore distractions, which improves concentration and attention.

Referral System

The BrainsCoin referral system is built on recognizing and rewarding the efforts invested by our users. We realize that community growth and its quality content is possible only with joint efforts. Therefore, our approach is aimed at fair and progressive rewards for attracting new members.

“Helping others to develop is no worse than developing yourself!”

Mechanics of the referral system

Our referral system offers users rewards for referring new members. The system differs for regular and Premium members, and has a progressive reward scale for referring additional Premium members.

Rewards for regular users: Every regular user referred earns the referrer a reward of 50,000 BrainsCoin.

Rewards for premium users: Referring a premium member is rewarded more highly and the system offers progressive bonuses for each subsequent premium member:

- For the first premium member, the referrer receives **125,000** BrainsCoin.
- For the second premium member, the referrer receives **150,000** BrainsCoin.
- For the third premium member the referrer receives **175,000** BrainsCoin.
- For the fourth premium member the referrer receives **200,000** BrainsCoin.
- For each subsequent premium member, the referrer receives **25,000** BrainsCoin more than the previous one.

This progressive scale has no upper limit, which allows active users to get bigger and bigger rewards as their contribution to the community grows.

Examples of referral rewards

For a better understanding of the mechanism, here are some examples:

If a user attracts 3 regular and 2 premium users:

3 regular users: $3 \times 50,000 = \mathbf{150,000}$ BrainsCoin.

1st premium user: **125,000** BrainsCoin.

2nd premium user: **150,000** BrainsCoin.

Total amount: 150,000 + 125,000 + 150,000 = 425,000 BrainsCoin.

If a user attracts 5 premium users:

1st premium user: **125,000** BrainsCoin.

2nd premium user: **150,000** BrainsCoin.

3rd premium user: **175,000** BrainsCoin.

4th Premium Member: **200,000** BrainsCoin.

5th Premium Member: **225,000** BrainsCoin.

Total amount: 125,000 + 150,000 + 175,000 + 200,000 + 225,000 = 875,000

BrainsCoin.

This system is designed to encourage active participation in the growth and development of our community. We equally value those who build their skills and those who help us attract new members who share our values and aspirations.

Our reward system allows each member to feel valued and be recognized for their efforts. We believe that this approach will allow us to create a flexible, active and strong community.

Game diversity

We realize that variety and novelty are the key factors of success of any gaming platform. That's why our game collection will be constantly updated with new and interesting projects. We actively monitor the feedback and wishes of our community in order to offer games that will be not only useful, but also interesting to users.

To do this, we try to keep in direct contact with the community and actively interact with users through various communication channels, including social networks, forums and surveys. We believe that involving the community in the process of developing and improving the platform is the key to its success. We listen carefully to suggestions and criticism to make our product as useful and interesting for everyone as possible.

Our plans include introducing various mechanics and features that will make the BrainsCoin platform even more engaging and diverse:

Multiplayer

We plan to add the ability to compete with other users in real time, which will add an additional level of interaction and competition.

Achievements:

Introduction of an achievement system that will allow users to earn rewards for completing various tasks and objectives, encouraging them to further develop. And something soon...

The concept of leagues

Our ecosystem features a league system that divides participants into tiers based on their activity and progress. Each league has its own unique parameters, such as maximum energy, number of available boosts and their cooldowns, as well as a reward multiplier. Advancement between leagues is based on accumulated achievements, which depend on completing various tasks on the platform.

Bronze League

Maximum Energy: **5**

Progress Boundary: **249,999** points

Every 24 hours the booster limit is updated for each league.

Maximum number of boosts: **3**

Reward Multiplier: **1x**

Bronze league is the starting point for all participants. Here, players receive a minimum amount of energy and boosts, allowing them to gradually familiarize themselves with the platform and gain experience to move up to higher leagues.

Silver League

Maximum Energy: **6**

Progress Boundary: **749,999** points

Every 24 hours the booster limit is updated for each league.

Maximum number of boosts: **4**

Reward Multiplier: **1.1x**

Silver League provides more energy and boosts, allowing participants to be more active. A small increase in the reward multiplier incentivizes players to increase their level of engagement.

The concept of leagues

Gold League

Maximum Energy: **7**

Progress Boundary: **2,249,999** points

Every 24 hours the booster limit is updated for each league.

Maximum number of boosts: **5**

Reward Multiplier: **1.25x**

The Gold league is starting to see a significant increase in capabilities. Reduced booster cooldowns and an increased multiplier allow for tangible benefits over lower leagues.

Platinum League

Maximum Energy: **8**

Progress Boundary: **9,999,999** points

Every 24 hours the booster limit is updated for each league.

Maximum number of boosts: **6**

Reward Multiplier: **1.5x**

The Platinum league gives members access to even more resources and significantly increased rewards. The 1.5x multiplier allows players to accumulate achievements much faster.

Olive League

Maximum Energy: **9**

Progress Boundary: **24,999,999** points

Every 24 hours the booster limit is updated for each league.

Maximum number of boosts: **7**

Reward Multiplier: **2x**

The Olive league represents a high level of engagement with double the rewards. Players from this league have access to significant resources and can progress faster.

The concept of leagues

Emerald League

Maximum Energy: **9**

Progress Boundary: **49,999,999** points

Every 24 hours the booster limit is updated for each league.

Maximum number of boosts: **8**

Reward Multiplier: **2x**

Emerald League is similar to Olive, but with more boosts, allowing participants to accumulate achievements even faster and more efficiently.

Brilliant League

Maximum Energy: **10**

Progress Boundary: **99,999,999** points

Every 24 hours the booster limit is updated for each league.

Maximum number of boosts: **9**

Reward Multiplier: **2.15x**

The Brilliant league offers participants even more options thanks to the reduced boosts cooldown and increased multiplier. Players in this league have a significant advantage in accumulating rewards and progressing.

JuniorBrain League

Maximum Energy: **10**

Progress Boundary: **149,999,999** points

Every 24 hours the booster limit is updated for each league.

Maximum number of boosts: **10**

Reward Multiplier: **2.3x**

JuniorBrain league offers a high level of engagement with maximum resources and increased rewards. This is the first step to the higher levels of the league system.

The concept of leagues

MiddleBrain League

Maximum Energy: **11**

Progress Boundary: **249,999,999** points

Boosts Cooldown: **5** hours

Maximum number of boosts: **11**

Reward Multiplier: **2.45x**

The MiddleBrain league adds even more energy and boosts, as well as an increased multiplier, making it attractive to experienced participants. Progression in this league is much faster.

SeniorBrain League

Maximum Energy: **12**

Progress Boundary: **499,999,999** points

Boosts Cooldown: **5** hours

Maximum number of boosts: **11**

Reward Multiplier: **2.6x**

SeniorBrain league offers a high level of resources and progression. In this league, players can accumulate rewards as fast as possible and dominate the ecosystem.

LeadBrain League

Maximum Energy: **13**

Progress Boundary: **999,999,999** points

Boosts Cooldown: **4** hours

Maximum number of boosts: **12**

Reward Multiplier: **2.8x**

LeadBrain League is an elite level where participants receive the highest rewards and minimal time limits. Here, players have access to the best opportunities in the ecosystem.

The concept of leagues

Megabrain League

Maximum Energy: **15**

Boosts Cooldown: **3** hours

Maximum number of boosts: **15**

Reward Multiplier: **3x**

Megabrain league is the pinnacle of the league system. This is where players get the highest energy and the highest reward multiplier. Players in this league have tremendous influence and power, making them the leaders of the entire ecosystem.

The league system gives players the opportunity to evolve and gain more and more benefits as they progress. The higher the league, the more energy, boosts and rewards are available, which motivates further development and participation in the ecosystem.

BrainsCoin Tokenomics

The tokenomics of the BrainsCoin project is the fundamental basis for its sustainable growth and successful development. It defines the token allocation strategy among the various ecosystem participants and key stakeholders. In this document, we present the overall token allocation structure, which will be refined and supplemented in future updates.

Key points of token distribution

Listing and centralized exchanges (CEX): A portion of the tokens will be allocated for listing on centralized exchanges to ensure liquidity and availability of tokens for trading.

Project Fund: A token reserve to support long-term development, research, marketing and other initiatives to strengthen the BrainsCoin ecosystem.

Airdrop: A certain percentage of tokens will be distributed via airdrop to attract new participants and raise awareness of the project.

Project team: Tokens will be allocated to reward the project team, ensuring their motivation and long-term commitment to the project's goals.

Investors: A portion of the tokens is reserved for early investors who have provided the necessary capital and strategic support in the early stages of the project's development.

Founders: Project funders will receive a certain amount of tokens in recognition of their leadership and contributions to the creation of BrainsCoin.

Users: The majority of tokens will be distributed to users, encouraging their participation in the ecosystem and supporting the decentralization of the project.

Easter Eggs

Our system includes a feature called Easterhouses, which adds an element of interactivity and entertainment for users. Periodically, we will add encrypted messages (passphrases) to different parts of our ecosystem. Users who successfully decipher and solve these messages will be rewarded.

We will also ensure the sustainability and security of the project, but also its dynamic development in the future.

How It Works

Placing Eastercocks

- Easterhouses will be placed in various elements of our project, including the website, mobile app, or social media.
- Each Easterhawk will contain an encrypted message that may require different skills to decipher, or simply attentiveness.

Rewards

- Users will receive rewards for successfully solving a passphrase. The type and size of the reward will depend on the difficulty of the passphrase.
- Rewards may include cryptocurrency, tokens from our project, or unique NFTs (non fungible tokens)

Disclaimer

WARNING! PARTICIPATION IN THE ACTIVITY OF DECIPHERING THE EASTERHOUSES AND EARNING REWARDS IS VOLUNTARY AND FOR ENTERTAINMENT PURPOSES. THESE ACTIVITIES DO NOT CONSTITUTE FINANCIAL ADVICE OR INVESTMENT ADVICE. SUCCESS IN UNRAVELING THE PASSPHRASES AND RECEIVING REWARDS IS NOT GUARANTEED AND DEPENDS SOLELY ON THE ABILITY AND EFFORT OF THE PARTICIPANTS.

WE USE PASSHACKS. TO ADD AN ELEMENT OF INTERACTIVITY AND FUN TO OUR ECOSYSTEM. THIS IS DONE SO THAT USERS CAN NOT ONLY ENJOY OUR PRODUCT BUT ALSO GET REWARDS FOR THEIR EFFORTS. WE HOPE THAT THIS FEATURE WILL BRING A LOT OF JOY AND EXCITING MOMENTS FOR ALL PARTICIPANTS.

Roadmap

15

Q2 2024 0 stage	Q2 2024 1 stage	Q4 2024/Q1 2025 2 stage	2025 3 stage	2026 4 stage
Project launch	TWA app release Improving game library End of farming	Listing R&D Creating projects in eco system	Games incubator Games platform NFT-market	WEB 2 and WEB3 M&A Special projects

Conclusion

BrainsCoin is more than just games and rewards. It is an opportunity to be part of a large community committed to developing intellectual skills, an opportunity to add value in a world that requires the ability to think flexibly and creatively. We strive to create a platform that inspires self-improvement, makes learning fun and motivates continuous development.

We are confident that together with our community we can create something more - an ecosystem where everyone can find something useful and interesting for themselves.

Together we will make the world smarter, and BrainsCoin will become an important part of it. Join us and remember: **“Use Brain and Gain!”**
